

ROVSHAN MURADOV

Blockchain Developer | DeFi Specialist

rovshan2525@gmail.com | @prostoRovshan | Batumi, Georgia | github.com/RovshanMuradov |
Open to relocation

PROFESSIONAL SUMMARY

Blockchain developer with 3+ years specializing in Solana ecosystem and DeFi protocols. Expert in building high-frequency trading systems and smart contract integrations.

TECHNICAL SKILLS

- **Blockchain:** Solana, Ethereum
- **Languages:** Go, Python
- **DeFi:** DEX Integration, AMM, Token Standards
- **Infrastructure:** RPC Nodes, WebSocket, Transaction Optimization

PROFESSIONAL EXPERIENCE

Blockchain Developer |

2021 - Present

Solana Multi-DEX Trading Bot | github.com/RovshanMuradov/solana-bot - Developed automated trading system for Solana supporting Raydium, Pump.fun, and Pump.swap - Achieved sub-second transaction execution with optimized gas fees and priority handling - Implemented real-time P&L tracking and portfolio management across multiple wallets - Integrated with Solana RPC nodes and WebSocket for mempool monitoring - Built modular DEX adapter system allowing easy integration of new protocols

DeFi Protocol Integration - Integrated multiple AMM protocols for optimal trade routing - Implemented slippage protection and MEV resistance strategies - Developed transaction simulation system to predict gas costs - Built monitoring dashboard for liquidity pool analytics

LANGUAGES

- Russian: Native
- English: Fluent

AVAILABILITY

- Available for remote work
- Open to relocation
- Open to hybrid roles (optional)
